

3. Literature List

This recommended reading list is provided for guidance only and is not exhaustive; if appropriate the latest edition of any book should be looked at if available rather than those listed here.

The reading list is not comprehensive. However, the sources for the exam questions will tend to come from these books, websites and journals. Candidates are reminded that textbook knowledge represents a substantial component of the examination. You should maintain a broad understanding of relevant publications in the field of poultry veterinary sciences.

List:

1. Diseases of Poultry, 13th Edition, 2013. Editor in Chief: D. E. Swayne, Associate Editors: J. R. Glission, L. R. McDougald, L. K. Nolan, D. L. Suarez, V. Nair. Wiley Blackwell/AAAP, ISBN: 978-0-470-95899-5.
